

Dermafix

General Information and aftercare

Dermafix is a revolutionary microneedling skin repair treatment that can significantly improve the appearance of ageing or scarred skin.

What problems can Dermafix treat?

Scarring - treatment can help to reduce the appearance of scarring and acne scarring

Anti-ageing - Dermafix can stimulate rejuvenating tissue regeneration, improving the appearance of fine lines, wrinkles, deep lines and creases

Rosacea & acne rosacea - helps reduce redness, strengthens & calms the skin in the affected area.

Skin tightening - the skin stimulation process triggers skin tightening – treating age-related skin laxity. It can improve the appearance of enlarged pores or even stretch marks

Hyper pigmentation - in the weeks after treatment, skin can develop a clearer and more even tone and complexion with pigmentation reduced

Hair loss - stimulating the scalp tissue is potentially very beneficial for fighting hair loss, by encouraging a healthier skin and better hair retention

Aftercare information

- Avoid any active/stimulating skin preparations for a couple of days (i.e. AHA's, retinol (vitamin A) or anything acidic).
- A high factor mineral-based sun protection is also recommended to protect tender skin.
- Skin may feel drier or tighter - this is quite normal.
- Do not sunbathe, use a sunbed, sauna or steam room for 1 month post treatment.
- Avoid waxing, electrolysis & bleaching on the area treated for at least 48 hours.
- Do not swim in chlorinated water for 14 days.
- No excessive exercise immediately after treatment.
- Avoid make-up for 24 hours.
- Take advice from your therapist if having laser treatment or considering laser treatment imminently.

How long before I see results?

You will notice a fresher skin within 6 weeks. However your skin will continue to improve over 6-12 month period.

How often can I have Dermafix treatments:

For anti-ageing treatments (e.g. collagen, skin rejuvenation) we recommend 4-6 treatments which are spaced 4 weeks apart.

For scars or acne scars, we suggest 6 or more treatments, spaced 4 weeks apart.

Areas that Dermafix can help to improve
