## Lash Lift Aftercare

Hints & tips to keep your lashes looking

*fabulous!*

- For 24 hours after your lash treatment do not let any water contact the lashes
- For 2 days after the lash treatment do not steam your face, use a steam bath, swim or wash your face with hot water
- Do not use any oil based products on the lashes or around the eye area
- We suggest wearing swimming goggles in the shower
- Only use a water based mascara on your lashes
- Chlorine and excessive swimming under water can seriously shorten the life of your lashes
- Do not try and relax your lash lift, please consult your therapist and book an appointment
- If you experience any itching or irritation, contact us as soon as possible
- Always book your next lash lift appointment within 6-8 weeks
- We recommend booking in to re-tint your lashes half way between lash lift appointments to keep them looking their best ~ approximately 3 to 4 weeks after your initial lash lift.
- Gently groom your lashes with an eyelash brush or comb to keep the lashes separated and lifted.
